## **DETAILED ACTION**

1. Applicant's preliminary amendment filed on December 08, 2005 to cancel claims 1-66 and add new claims 83-117 has been entered and made of record. Currently, claims 67-117 are pending.

### ***Election/Restrictions***

2. Applicant's election without traverse of Invention of Group I, Claims 83-117 in the reply filed on June 13, 2006 is acknowledged.

3. Claims 67-82 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention of Group II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 13, 2006.

4. Applicant's amendment to cancel these nonelected claims 67-82 in response to this office action is advised.

### ***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 83-117 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,611,617 [referred as the patent ‘617 hereinafter]. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons:

It is noted that application claims 83-117 recite a broader recitation of the invention and patented claims 1-10 of the patent ‘617 cover the equivalent subject matter as that of applications claim 83-117 of the instant application. Specifically, each of the limitations of claims 83-117 of the instant application is set forth in patented claims 1-10. While the patented claims 1-10 include additional limitations not set forth in claims 83-117 of the instant application, the use of transitional term “comprising” in the instant claims 83-117 fail to preclude the possibility of additional elements. Therefore, claims 83-117 of the instant application fail to define an invention that is patentably distinct from claims 1-10 of the patent ‘617.
